

TRACE™
POWER RING

- Trace is a patent-pending aluminum rail mounted around the perimeter of a table top that delivers power and A/V connections to a minimal and seamless way.
- Every seat at the table has access to power at the edge of the surface.
- Trace eliminates clutter from the surface and frees up valuable table space.
- Two Circuits of power 20 Amps per circuit (40 Amps) are delivered through one in-feed.
- One concealed infeed powers an entire table up to 40'.
- Power options include: 110 V duplex receptacles, USB power or a mix of both.
- Trace features all UL listed power components.
- A/V connectivity options for the ends of the table include HDMI, VGA, and USB Data inputs.
- All power and data wiring is concealed behind a 2" tall anodized aluminum rail.
- A leg mounted or center-column floor-to-surface wire manager conceals wire infeeds.
- Trace works on ANY rectangular surface in the Eleven Collection including back painted glass.
- Trace eliminates field cutting surfaces and can be retrofitted.
- Trace can be plugged into a standard outlet (system will go down to 1-20 amp circuit) with basic installation labor or hardwired.
